This catalogue is printed on 100% recycled (100% post-consumer) non de-inked paper. The cover is 100% recycled (25% post-consumer, 75% pre-consumer) mechanically de-inked paper.

Always try to use a recycled paper with some kind of post-consumer content and use a paper that is oxygen bleached, hydrogen peroxide bleached, mechanically de-inked or not de-inked at all (frequently called "chlorine free"). Using these specifications encourages paper manufacturers to improve their bleaching processes from the older methods which produce a very toxic human-made chemical by-product — dioxin. Newer bleaching processes mentioned above still can create the by-product dioxin, but in much smaller quantities, and it is a step in minimizing the toxic waste we all contribute in producing.

Here's a list of our releases that are in print, in numerical order, for handy cross-referencing.
